What type of presentations would you like to see at future breakfast meetings?

- Inspection – set up for tools/equipment
- Presenters who can remind you of business and personal safety issues
- What is fully required in an inspection, what all needs to be inspected (like tools/equipment)
- Safety orientation program/plans
- Similar to today's presentation – safety tips for both work and home
- Anything in regards to incidents (direct and indirect) or return to work but more about employee and employer obligations
- First Aid requirements for business
- More from WCB
- Similar to Randy's. Focus on improvements to process; addressing liability & risk assessments
- Real life examples of situations that came from lax policies at home or work
- I think the direction we are taking is great. Awareness on daily stuff we take for granted like today's
- More of this kind of presentation based on code and proper ways to keep your business safe
- Industry
- Motivational to support employee engagement in safety accountability

Comments

- Opened my eyes a lot more to what needs to improve not only at work but at home
