Excellent Good Fair Poor

RESPONSE: 98% believe Key Auto Group's Presentation was **excellent or good**

65% (18/28) Excellent

33% (9/28) Good

What type of presentations would you like to see at future breakfast meetings?

- Keep doing what you are doing! I'd be interested in presenting for "Motor Safety Leaders of Regina"
- Like to hear more about how companies are including safety practices into their budgets
- It's good to see a variety of "kinds" of businesses in C6 and how they relate to safety
- More like this one – actual working examples
- Examples of implementation from private sector
- This meeting was good to move the "safety" initiative forward. Keeping it top of mind and giving the industry an opportunity to get together and talk about ways to improve
- Similar to the Fire Marshall's speech we had last year
- Human rights presentations
- More on WCB
- I believe having more companies come forward to talk about their experiences with implementing safety standards is always a good topic
- A direct planning meeting of start-up to completion of COR Certification
- I really liked the panel and Q & A format for the session – makes it far less formal. I would like to see a company that takes safety out of their organization and into the community
- 5 S or learn as it is for safety
- Similar to this one

- Ideas – small and large – to run successful safety programs – how to get buy-in and keep it fresh and in employees’ minds
- More of the same – leaders in safety sharing best practices and day-to-day experiences
- More of the same
- It is good to hear testimony from the business owner’s perspective
- Safety journeys in our industry
- More of what companies are doing to proactively promote safety in the business – similar to this one – before serious injury happens
- Safety professionals (Fire, EMS)
- Discussions from OH & S on what they have seen and what other companies are doing;
- Continue with real Saskatchewan employers sharing their journey to safety - relevant, do-able, realistic examples help as role models for others
- Similar as today – very interesting and informative

Comments

- Continue with these great meetings
- Safety first
- Great presentation – I know where I’m buying my next Toyota truck
- Thanks
- Great job by Key Auto Group doing the right things for the right reasons
- Good to see action without a negative starting the process
- Would you consider changing the timing of this event to early/mid-May? With the annual Safety Charter Event in June, it might encourage higher attendance. Have them semi-annually in May and November
- The meeting and presentation was excellent and well organized. Lots of information that are very useful for company, especially 5S
- Great job bringing in business owners/leaders that believe in safety
- Thank you
- The more meetings I attend, the more informed I am on occupational, health and safety
