News Release to Motor Safety Association Members

Motor Safety Association Partnership with St. John Ambulance

St. John Ambulance is proud to present to the Motor Safety Association's Members
Training at a discounted rate

May 30, 2018 (Regina, SASK) — St. John Ambulance is a non-profit organization whose mission is to enable Canadians to improve their health, safety and quality of life by providing training and community service.

Our Community Services volunteers include uniformed members who serve communities across Saskatchewan, providing first aid and emergency response support, as well as improving the quality of life for people confined to a health care facility through our Therapy Dog visitation program. Our volunteers contribute thousands of hours to Saskatchewan communities each year. We support these services by providing training to the province of Saskatchewan.

The Motor Safety Association (MSA) is a non-government, non-profit organization funded through an operational agreement with the Workers' Compensation Board. Their ultimate goal is to reduce the number of injuries and the duration of those injuries in our industry. They strive to educate their members on the benefits of developing and maintaining an effective Safety Management System.

The Motor Safety Association has partnered with St. John Ambulance for the 2018 year for a special offer to their MSA members in hopes to continue the decrease of work related motor industry injuries. St. John Ambulance is offering a **10% discount on First Aid/CPR/AED Training** to all the Motor Safety Association members as part of this effort along with **a 10% discount on all first aid and safety products** (*with the exception of AED's*) for the 2018 year.

To book your course at the Motor Safety Association discount:

1. **Contact your Business Development Coordinator for the province of Saskatchewan; Sara Gallagher via 306-570-3120 or sara.gallagher@sk.sja.ca with your preferred date and time using promo code: **MSA10**.**
2. **You will receive a training partner agreement with the detailed terms for your organization.**
3. **Return the training partner agreement to sara.gallagher@sk.sja.ca and you will receive your confirmation of training.**

St. John Ambulance offers a variety of safety products to fit your needs, including Automated External Defibrillators (AED's). As a non-profit, we pride ourselves in going to extra mile by including orientations to help match your confidence in utilizing those products.

This initiative is a joint effort to increase the awareness, utilization and importance of First Aid/CPR/AED training in Regina as well as across the province. We hope to see you at the St. John Ambulance Training Centre soon!
